Trash boxes

for NW 100, with silt bucket made of composite, with ductile iron grating, SW 100/10 mm, black, class D 400, 4-fold bolted, 0,5 m

Technical information and metrics

Article No.	48754
-------------	-------

Einlegetiefe	20 mm
--------------	-------

Weight	8.79 kg
--------	---------

Material	Ductile iron GJS 500-7, recycled, modified Polypropylene, Steel black galvanised
----------	--

Intake cross-section	426.0 cm ² /m
----------------------	--------------------------

Nominal size	100
Material grating	Ductile iron GJS 500-7
Regulations	EN 1433, DIN 19580
Sales text	Sump unit with ductile iron grating SW 104/10 mm, black, cl. D 400, with silt bucket made of composite, RECYFIX NC 100, 0.5 m
Product description	RECYFIX NC 100 - Trash box made of modified PP, according to EN 1433, with integrated angle housing, four-sided preformed pipe connection element (DN/OD 110 on the front side, DN/OD 110/160 on the sides), with removable silt bucket made of composite, suitable for both-sided connection of channel types RECYFIX NC 100, with ductile iron grating made of ductile spheroidal ductile iron GJS 500-7, slot width 104/10 mm, black, loading capacity from A 15 - D 400, fourfold locking, L/W/H 500x160x504 mm, item no. 48754
Packaging unit	28
