Door Controls	75 - 78
Cylindrical Locks	79 - 81
Rim Locks	82 - 87
Furniture Locks	88 - 91
Door Fittings	92 - 94

Nearly 130 years of legacy:

Nearly 130 years ago, **Ardeshir Godrej**, a lawyer-turned-entrepreneur and passionate nationalist, came across a **newspaper report about rising burglaries in Bombay**.

Determined to build a safer India through indigenous innovation, he **started a small lock workshop in Mumbai with minimal capital**.

What began as a bold idea would go on to become India's most trusted name in security and home safety.

World's first springless lock:

Godrej patented the world's first springless lock, eliminating the most failure-prone component of conventional locks. The breakthrough that established Godrej as an engineering-led pioneer in safety.

1907

Introduction of the Ultra range:

The Ultra range introduced stronger, more advanced locking solutions for a evolving urban India.

1995

1954

The iconic Nav-Tal lock:

The launch of the Nav-Tal lock made Godrej a household name. Affordable, robust, and reliable, it became synonymous with home safety across Indian towns and cities.

2007

3KS, Godrej's 3 Curve Safety system:

A breakthrough that added layered protection and advanced the concept of locks as complete safety solutions rather than just hardware.

Smarter living starts with Godrej smart locks:

Introduced India's first smart biometric digital locks. Bringing together technology, convenience and modern home safety.

2010

Launch of Home Safety Day:

Founded 15th November 2017 as Home Safety Day - a day dedicated to promoting awareness about superior home safety solutions.

2017

Made-in-India hospitality lock:

Built for modern hotels and hospitality spaces, it combined seamless access, operational efficiency and dependable safety.

2023

2011

Expansion into architectural fittings and solutions:

Extending its expertise from safety to the wider modern home solutions.

2020

First Made-in-India smart lock:

Designed and engineered specifically for Indian homes and lifestyles.

2025

First IoT Based Lock:

Launched India's first interconnected smart lock Advantis IoT9. A major leap towards fully connected, intelligent home safety ecosystems.

The 5 Safety Strengths:

To help you optimise your home's safety, we recommend that you pick the right safety strength depending on your home's unique safety needs. The higher the safety strength, the safer your home will be.

Safety Strength 5
Advanced Digital
Access Control Technology

Godrej digital locks are based on hi-tech electronic systems which give you multiple access modes, like wearables, NFC, biometric, RFID card, etc., for convenience and enhanced safety.

Safety Strength 4
EVVA 3 Kurve System
Technology (3KS)

The highest safety strength, Godrej EVVA, in mechanical locks, comes with a revolutionary EVVA 3 Kurve system technology (3KS) with a floating pin, sidebars and locking bar. This conforms to European standard EN 1303. The 30 trillion combination cycle means that a single key will not be repeated for the next 30 trillion keys. Since there are not 30 trillion humans on the planet, it's virtually impossible for someone else to have an identical key as yours.

Safety Strength 3
Extra Safe
Technology (EXS)

Godrej Safety Strength 3 locks come with Advanced, Angular multi-row pin-cylinder technology. The maximum number of combinations (key differs) that can be provided is up to 2 billion and a highly complex system of master key solutions is possible.

Safety Strength 2
Ultra Safe Technology

Godrej Safety Strength 2 locks have highly precise computerised dimple keys with Advanced multi-row pin-cylinder technology. Here, the maximum number of combinations (key differs) that can be provided is up to 100 million, which makes each key unique and non-interchangeable with any other key.

Safety Strength 1
Basic Safety

Godrej Safety Strength 1 locks come with the conventional mechanical locking system through basic security systems which have levers, wafers, tumblers and single-row pin-cylinder technologies.

Surface Mounted Door Closer - 60 Kg

Features:

- 1 Lakh lifecycle tested.
- Aluminium die casted body.
- Adjustable closing speed.
- Thermo stable hydraulic fluid.

Benefits:

- Ensures longer life and high durability.
- Smooth finish & provides smooth machining.
- Versatile speed according to the user's requirement.
- Smooth functioning in any climatic condition.
